

Single 2-flask packet.....\$5.00

Five or more 2-fl. pkts. @ \$3.50 per pkt.

#V-75 V. JANET TAGAWA X V. SANDERIANA - Combining vigor and ever-flowering habit of pod parent with large, showy Kono Sanderiana.

#V-77 V. SUAVIS X V. MERRILLIT X V. MANILA - Pod parent chartreuse, dotted with russet brown. Good, rich pink Manila was used as pollen parent.

#165 GRAMMATAPHYLLUM MEASURESIANUM X SELF - This "Giant" Orchid produces sprays 5 ft. tall, with dozens of 2½-inch green blooms, dotted brown.

#799 C. OENONE ALBA X C. HENRIETTA JAPHET - Expect clusters heavy Whites with practically no yellow in throat for June season.

#817 BC HEATONENSIS X B. DIGBYANA - Chartreuse Brasso with pink fringed lip.

#820 B. DIGBYANA X SELF - Mother of all fringed Brassos of which mature plants are very scarce, so we decided to raise some from seed.

#829 C. BARBARA BILLINGSLEY X C. BEVERLY BOSWELL - Free-flowering heavy textured Whites for Winter Holiday seasons.

#830 C. BARBARA BILLINGSLEY X C. TENNESSEE - Larger Whites than #829. Winter.

#831 C. WHITE CHRISTMAS X BLC GOLDEN MYTH - Strong, solid yellow of Golden Myth expected to dominate many of the pure White pod parent. Winter-Spring season.

#832 C. ENID ALBA X LC ETHEL MERMAN - Fine WCL production; Spring or twice yearly. Ethel Merman had solid blue-lavender lip, topped by White zone.

#834 C. UNDINE AQUINAE - This cross of Mossiae, Reineckiana with WCL Intermedia should produce some crisp, heavy textured WCL Undines for Spring season.

#835 LC ISABEL SANDER ALBA (C. Mossiae, Reineckiana X Lc Canhamiana alba) - Fine, free-flowering WCL hybrid for May-June season.

#836 LC COPTHORNE (Lc Sargon X C. Hardyana, Ruby) - The 8-inch, vividly dark Sargon with solid Ruby lip and small gold eyes should be intensified and made more free-flowering by the cross with dark, red plum Ruby variety of Hardyana. May-June.

#837 C. SARA COHN VAR GOLDEN WEST X LC GATTON GLORY X LC CANBERRA X LC MIMOSA - Yellows with deep rose to purple lips, veined gold. June or twice yearly.

#838 C. HARDYANA X C. SARA COHN VAR GOLDEN WEST - The rich red-lavender of this Hardyana, with gold veined lip and throat, will foster some reds from the cross. Others should be good yellows. June or twice yearly.

#839 C. DUSABEL ALBA X LC WHITECREST - Pod parent was one of three 8-inch WCL on stem; deep Royal Purple lip; yellow zone leading into throat. Lc Whitecrest equally large and well formed, with lower half of lip brilliant purple. White S & P. June.

#840 C. ELEANORE ALBA X LC JAY MARKEL - Another fine June blooming WCL cross. Lips of both parents solid purple, edged white, with gold zones in throat.

#841 C. KING GEORGE X C. SARA COHN VAR GOLDEN WEST - The pod parent was one of five 6-inch lemon yellow blooms on two leads. Rose-fuchsia frilled lips, edged light. Gold-veined maroon throat. The deeper golden yellow Sara Cohn should influence all offspring to be good strong yellows. Summer or twice yearly.

DANIEL RYERSON, BOX 805, HOMESTEAD, FLA.
